Farmacia Mostarda Vincenzin
Pharmacy

Applications areas

Augmented.City

Education
Learning support - Interactive models
Shared experiences - Improved training

Industrial
Maintenance support - Process Control
Diagnostics - Integration with MES and ERP

Smart City
Enhancement of Heritage - Services to the citizen Tourism - Support for autonomous vehicles

Retail/Advertising
Innovative advertising - Engaging user experience
IP Protection with NFT - Brand Promotion

Augmented.City

AR School Labs

During these labs, students explore STEM subjects through the innovative tools of immersive storytelling and create personalized experiences.

Audience of students: from 10 to 17 years

Over **3000** students have successfully taken part in our AR Laboratories.

AR INDUSTRIAL

Augmented.City

Plant AR based Supervision System Using to Optimize Maintenance Times

- AR visualization of instrumentation status and integration with the plant management system.
- Selection of specific devices and field testing of the devices using the developed applications.
- Navigation inside the plant

Smart City

Augmented.City

- Digital twins in 230+ cities
- Large scale locations e.g. the city of Bari (**110sq km**)
- Valorisation of the historical inheritage for **15+ italian municipalities** like: Rome, Bari, Monopoli, Molfetta, Province BAT
- Museums and Galleries

https://youtu.be/wQwNGWrsuew

The Church MARIA SS.ROSARIO

Showcasing the restoration work

- Involving Bari's young people in discovering its history, architecture, and spirituality
- Enhancing architectural treasures for residents and tourists
- Making fragile elements accessible without damaging them (the Putridarium)

A series of seminars for schools to promote the historical, architectural, and spiritual heritage.

Usecase: Valorisation of the cultural haritage
