MyGeoVerse & Partner Demonstrations

Ali C. Hantal

Co-president of the Open AR Cloud Association
Adoption Office of the OGC GeoPose Standards working group.
Leader of the MSF Forum Labs Initiative
Founder & CEO of XR Masters

ISMAR 2026

October 5 - 9, Bari, Italy

The 25th International Symposium on Mixed and Augmented Reality

IEEE IEEE COMPUTER SOCIETY IEEE VGTC

Our Vision

The Geospatial Layer for Devices & AI Agents

MyGeoVerse is the foundational intrastructure for spatially aware AI, providing the persistent geospatial layer that connects the physical world to intelligent digital experiences.

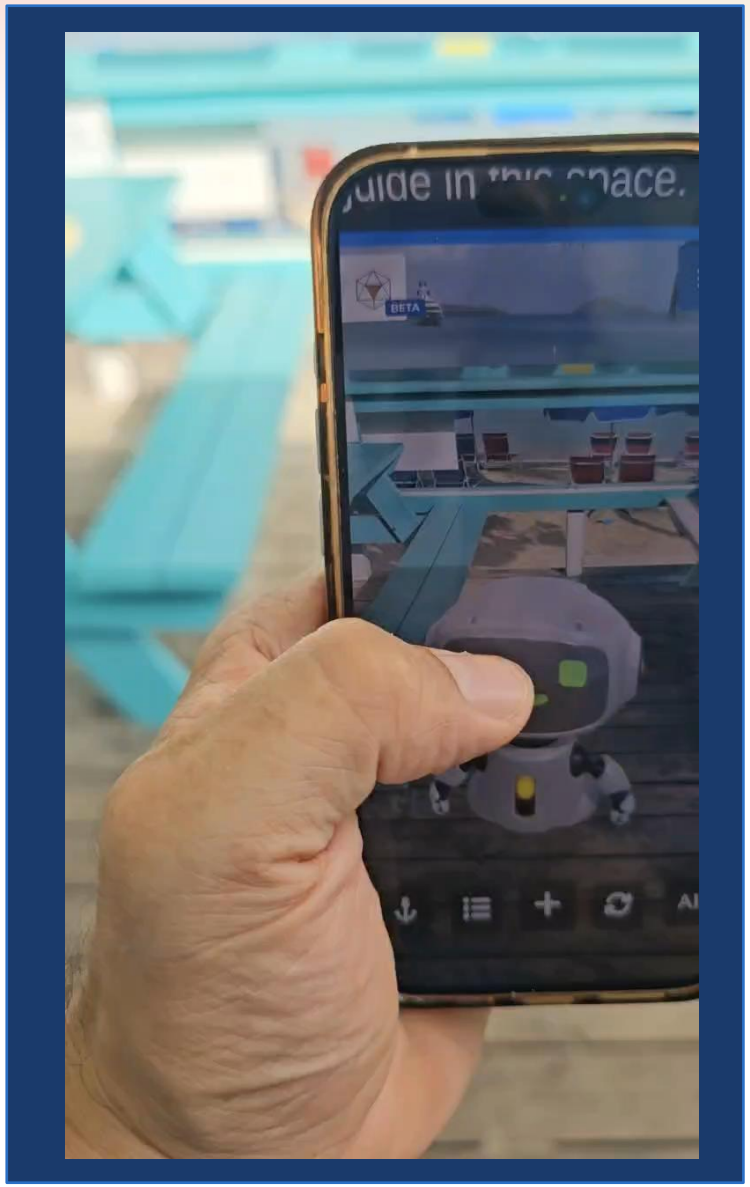

AI AGENTS & SPATIAL APPS
Application developers, creators, schools

MYGEOVERSE — GEOSPATIAL LAYER
Content • Community • Commerce • Standards

VPS / LOCALIZATION INFRASTRUCTURE
Spatial Anchors • GPS • Visual markers • OSCP

HARDWARE LAYER
AI Glasses • XR Headsets • Mobile • Wearables

LOCATION-AWARE CONVERSTIONAL AI AVATAR DEMO

Conversational AI Tour Guide

Context-aware

Knows the location, the visitor, and the moment

Customized POIs

Discovers the POIs we create for your location and provides custom information about them

Personalized Recommendations

Learns the user's preferences and provides personalized recommendations.

Multilingual

Serves visitors in their own language, automatically

Next paradigm

From static AR content to living, intelligent spatial experiences

TESTBED PROGRAM
&
PARTNER DEMOS

ISMAR 2026

October 5 - 9, Bari, Italy

The 25th International Symposium on Mixed and Augmented Reality

IEEE IEEE COMPUTER SOCIETY IEEE VGTC

OPEN AR CLOUD TESBED PROGRAM

OARC is inviting universities, schools, cities, innovation centers, research organizations, technology communities, and other organizations interested in the future of the Spatial Web to join the program as Testbed Partners. Testbed Partners provide real-world environments where open and interoperable spatial technologies can be deployed, tested, demonstrated, and explored.

The Testbed Partner Journey

From Open Standards to Real-World Spatial Experiences

01

Understand

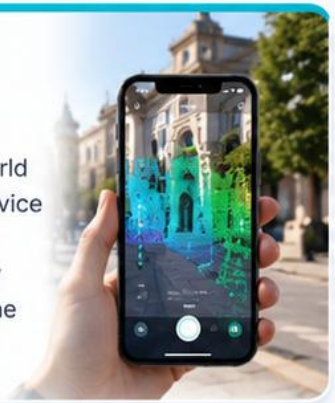

Learn about OARC, the AR Cloud and Spatial Web, and the four standards and protocols: OGC GeoPose, OGC POI, OSCP GeoPose Protocol, and OSCP Spatial Content Discovery.

02

Map

Digitally map a real-world location using VPS Service Provider technologies such as AC Scanner by Augmented City and the MultiSet mobile app.

03

Publish

Upload and publish spatial content and Points of Interest through MyGeoVerse.

04

Place

Place spatial content at real-world locations using the MyGeoVerse iOS or Android mobile app.

05

Localize

Localize using different VPS services through the interoperable Testbed environment.

06

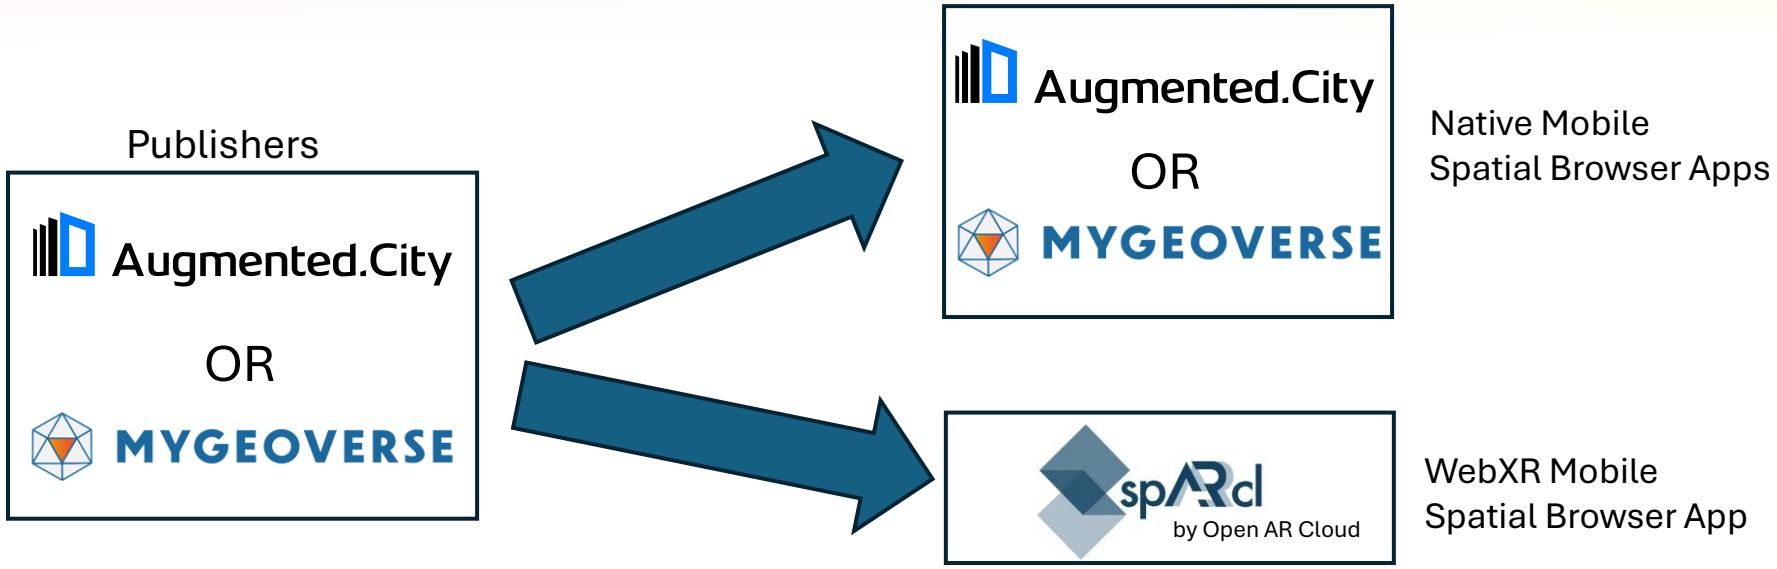

Discover & Experience

Use spARcl WebXR and the MyGeoVerse mobile spatial browser to discover, view, and interact with spatial content at its intended real-world location.
