Summary & Call to Action

Ali C. Hantal

Co-president of the Open AR Cloud Association
Adoption Office of the OGC GeoPose Standards working group.
Leader of the MSF Forum Labs Initiative
Founder & CEO of XR Masters

ISMAR 2026

October 5 - 9, Bari, Italy

The 25th International Symposium on Mixed and Augmented Reality

Our Projects

Open and interoperable spatial computing

SpatialDDS

Discover, distribute and synchronize spatial data.

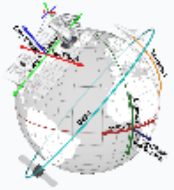

OpenVPS

Self-hosted visual positioning based on OGC GeoPose.

Reality Modeling

Standardized descriptions of real-world environments.

GeoPose

Position and orientation through an OGC standard and OSCP protocol.

OSCP

Open architecture connecting physical and digital worlds.

spARcl

A WebXR spatial browser for nearby services and AR content.

https://www.openarcloud.org/projects/

How Can I Contribute?

Four ways to take part

01 Contributor

Share code, research, documentation, testing or other expertise.

02 Testbed

Provide a real-world environment to test and demonstrate OARC technologies.

03 Testbed Service Provider

Integrate your technologies or services into OARC testbeds for evaluation.

04 Implementer

Use OARC-supported standards and protocols in your products or applications.
