UBICOMP ISWC2025

14-16 Oct. 2025
Helsinki, Finland

Tutorial Session:
Building interoperable location-based augmented reality with the Open AR Cloud

Gábor Sörös

James Jackson

Mikel Salazar

Christine Perey

Ali C. Hantal

Jan-Erik Vinje

Mikko Karvonen

Katherina Ufnarovskaia

Alina Kadlubsky

OPEN AR CLOUD

UBICOMP ISWC2025

14-16 Oct. 2025
Helsinki, Finland

Agenda

Session 1 (14:30-16:00)
Introduction (10 min)
Spatial Web basics (20 min)
GeoPose (15 min)
Visual positioning (45 min)

Coffee break
Hands-on testing outdoors (30 min)

Session 2 (16:30-18:00)
Service and content discovery (30 min)
Client applications (30 min)
Interoperability demo (10 min)
Reality modeling (10 min)
Wrap-up and discussion (10 min)

OPEN AR CLOUD EUROPE

UBICOMP ISWC2025

14-16 Oct. 2025
Helsinki, Finland

OPEN AR CLOUD

The Open AR Cloud (OARC) is a **global non-profit organisation** founded in 2018 with the mission to drive the development of **open and interoperable spatial computing technology, data, and standards** to connect the physical and the digital worlds for the benefit of all.

OPEN AR CLOUD

UBICOMP ISWC2025

14-16 Oct. 2025
Helsinki, Finland

OPEN AR CLOUD EUROPE

To support interaction with the European tech industry and institutions, a branch of the Open AR Cloud Association, "**Open AR Cloud Europe**" has been established in Munich, Germany, in July 2020: Our Official European presence will enable us to collaborate closely with government or academic organizations and companies throughout the EU.

Previous EU-funded projects

OPEN AR CLOUD EUROPE

Towards resilient future of EU Article 4

The Commission aims:

• Action 4: Explore, in consultation with Member States, the **launch of a new European Partnership** to develop an industrial and technological roadmap (going to launch Oct. 2025)

• Action 5: Support EU Cultural and Creative Industries to **test new business models** in virtual worlds through Creative Europe; **foster matchmaking** between virtual world developers and industrial users; and leverage the European Digital Innovation Hubs and Enterprise Europe Network to **support virtual worlds hubs** and to **promote the uptake** of new virtual world solutions.

• Action 6: Support the **development of standards for open and interoperable virtual worlds;** explore the potential of new digital cooperation models;
develop a toolbox to fight counterfeiting, including in virtual worlds;
and promote the use of **virtual worlds regulatory sandboxes** by Member States.

EFF (2028-2035)

The Commission aims:

• The European Commission presented its proposal for the **next EU Multiannual Financial Framework (MFF, 2028-2034)** with a total volume of almost **2 trillion euros** (in current prices) - which includes a significant **budget increase** for the **next EU Framework Programme** for **Research and Innovation**.

• Horizon Europe (2028-2034) will be tightly **connected with the upcoming European Competitiveness Fund (ECF)** in order to enable a smoother (funding) flow from fundamental to applied research to start-ups to scale-ups.

Next steps at the EU level: For Horizon Europe and the ECF regulation, the ordinary legislative procedure applies. Final agreements are unlikely to be reached before the **second half of 2027**.

Responsible development and uptake of XR technologies
